COVID Guidelines For Audiences

Live Theatre Workshop is committed to continuing great theatre while keeping our patrons, artists, and staff safe from the transmission of COVID-19. We closely monitor CDC and local health department recommendations to ensure that we align with the best practices. Below are our current guidelines and expectations. These guidelines will be updated as health recommendations improve or worsen.

VACCINATION
We encourage all patrons to be fully vaccinated for COVID-19. We will no longer check vaccination status except for productions where it has been requested by the cast and crew. These shows will be updated and listed here. For the production of Fremont Junior High is not Doing Oklahoma, proof of vaccination is required or a negative PCR test within 72 hours.

MASKS
Please bring and wear your mask for the duration of the time you are in the theatre. Performers are all vaccinated, tested weekly, and will not be wearing masks during the performance.

SELF-WELLNESS ASSESSMENT
All patrons, staff, performers, and volunteers are asked to ensure they are feeling well and without COVID related symptoms before attending a production. If you aren’t feeling well or aren’t sure, we will reschedule your tickets.

LIMITED SEATING
All productions will be limited to 70% capacity. All seating will be reserved. One or more chairs will separate all parties. Reservations are highly encouraged so that we can maintain distance and maximize seating capacity. Please let the box office know if you have special seating needs.

DIGITAL PROGRAMS
There will be no physical programs. Programs can be accessed at the theatre with a smartphone and can also be emailed to you upon request. Show and performer information will be posted in the Lobby.

SOCIAL DISTANCE
There will be plenty of outdoor space to spread out before, during intermission, and after the show. We ask that everyone maintain distance according to local safety guidelines.

LIMITED TIME
Seating will begin no earlier than 30 mins before show time, with assistance and accommodations for patrons with special needs. Patrons are welcome to wait for seating in any of our outdoor spaces.

AIR FLOW
HEPA filters and HVAC fans will run throughout the theatre to ensure a consistent exchange of fresh air.

COVID EXPOSURE
All patrons, staff, performers, and volunteers are asked to remain at home if they have been in contact with someone who is known or suspected to have COVID-19 in the past 6 days.

We cannot eliminate all risk of infection. Please consider your personal health and circumstances when making the choice to attend live theatre.
